Virtual Test Agents & Platforms for 5G Evolution

Spirent Virtual Test Agents (VTAs) emulate network functions, devices and user activity so you can test and assure your evolution to 5G across the service lifecycle – from the lab to the production network. Our VTAs provide comprehensive support for the functions depicted in this poster (and many more!). Contact Spirent to learn more.

Emulate, Test & Assure 5G, LTE, Wi-Fi (and more!) **VTA VisionWorks Virtual Test Agent (VTA)**

VisionWorks E5
Outdoor-mountable VTA hosting platform with LTE/Wi-Fi over-the-air testing

Landslide E10
VTA hosting platform with optional LTE/Wi-Fi over-the-air testing

Landslide C50/100
VTA hosting platform with ability to emulate large volumes of subscribers & traffic

Spirent Virtual Test Platforms (VTPs)
Platforms for hosting **VisionWorks** VTAs when NFVi and white boxes are not available or over-the-air testing is required
